## **Information on new draft of IALA Guideline No. 1078 on The Use of Aids to Navigation in the Design of Fairways and Waterways**

### **1 SUMMARY**

This paper gives some comments and information on the new draft of the Guideline No. 1078. The new draft is a separate input paper.

#### **1.1 Purpose of the document**

ANM Committee should have this background when deciding on forwarding the new draft to Council or other committees.

#### **1.2 Related documents**

ANM 15 input: ANM15/12/4 (Formerly ANM14/output/9)

ANM 16 Input: 16/9/3

### **BACKGROUND**

The version 1 of the Guideline was forwarded to Council in 2009. It was not accepted because it was too complicated. The version 2 has a clear structure (ANM 16/9/3) and includes only those issues that are directly relevant for design of AtoN for a fairway or waterway. All further considerations included in the version 1 were taken out. So, the new draft is shorter and reads better.

### **2 DISCUSSION**

It has to be considered if the new draft

a) still has too many of not relevant details or

b) some of those issues that were taken out should be kept (these can be found in the former version ANM 15 input 12/4, formerly ANM14/output/9).
